3. The following is an examiner's statement of reason for allowance:

The prior art fails to teach or suggest a display device comprising a plurality of pixels, each of the pixel comprising: a serial-to-parallel converter converting a serial digital image signal supplied serially to the display device to a parallel digital image signal; a DA converter converting the parallel digital image signal to an analog image signal; and a pixel electrode configured to receive the analog image signal, wherein the serial-to-parallel converter is connected to a drain signal line supplied with the serial digital image signal, and comprises a plurality of pixel selecting transistors connected to the drain signal line and a plurality of shift registers, each of the shift registers supplying a sampling pulse to a gate of a corresponding pixel selecting transistor for sampling the serial digital image signal at a predetermined timing as claimed in claim 2.

The prior art fails to teach or suggest a display device comprising a plurality of pixels, each of the pixel comprising: a serial-to-parallel converter converting a serial digital image signal supplied serially to the display device to a parallel digital image signal; a DA converter converting the parallel digital image signal to an analog image signal; and a pixel electrode configured to receive the analog image signal, wherein the DA converter comprises a plurality of capacitor electrodes coupled with the pixel electrode, each of the capacitance electrodes having a weighted capacitance ratio to couple with the pixel electrode and a clock supplying portion supplies a periodic clock signal to the capacitor electrodes in response to the parallel digital image signal as claimed in claim 3.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
